

USER GUIDE

Welcome to the user guide for an online pharmacy using command line interface! In this guide, we'll cover all the features and their working on the website so you can use it with ease.

User Registration: To use the website, you need to create an account. You can sign up for an account by typing the command "register" on the command line interface. You'll need to enter your personal details such as name, email, phone number, and password.

Medication Information: Once you find the medication you need, you can type the command "info" followed by the name of the medication to see more information about it, including its dosage, side effects, and instructions for use.

Prescription Upload: If you have a prescription for the medication, you can upload it to the website by typing the command "upload" followed by the file name or location.

Shopping Cart: After you add the medication to your cart, you can view your shopping cart by typing the command "cart". You can modify the quantity or remove the medication from the cart by typing the commands "add" or "remove" followed by the name of the medication and the quantity.

Checkout: Once you're ready to purchase the medication, you can type the command "checkout". You'll need to enter your shipping and billing address, choose the shipping method, and enter the payment details.

Order Confirmation: After you complete the checkout process, you'll receive an order confirmation on the command line interface. The website will also provide you with an order number and estimated delivery date.

Order Tracking: You can track your order status by typing the command "track" followed by the order number. You'll be able to see the delivery status of your order, including its current location and expected delivery date.

Customer Support: If you have any questions or concerns, you can contact customer support by typing the command "support". You can contact them via email or phone, and they'll be happy to assist you.

That's it for the user guide for an online pharmacy using command line interface. We hope this guide helps you use the website with ease.
